

**Addendum 2 - Broadband Grant NOFA #003 (“NOFA”) Scoring Rubric**

Pursuant to Section 3 (Scoring Methodology) of the NOFA, an addendum identifying the specific point values assigned to each evaluation factor or subfactor to be scored as it relates to Infrastructure Projects and Adoption Projects submitted in response to the NOFA will be posted immediately prior to the Application due date. This Addendum satisfies that requirement. Regardless of whether an Applicant’s Project is comprised of only one or both components, the Broadband Infrastructure and Broadband Adoption components of any proposed Project will be scored and evaluated separately.

Notwithstanding anything in the NOFA to the contrary, in both the Evaluation Committee making its recommendation(s) to the Office and the Office making its final Award decision(s), neither the Evaluation Committee nor the Office is bound by any scores or scoring system used to assist in assessing the relative merits of each Application. The scores and scoring system are a tool to facilitate intelligent decision making and a consensus-based decisional process that considers the key factors set forth in the NOFA.

**3A Broadband Infrastructure Project Scoring Rubric**

A total of one hundred (100) points distributed over the nine (9) factors identified in the NOFA are available for Broadband Infrastructure Project Applications submitted to the Office in response to the NOFA. This Addendum #X identifies the specific point values assigned to each evaluation factor set forth in Section 3A.1.1 (Quantitative Factors) and 3A.1.2 (Qualitative Factors) of the NOFA, restated below, which Addendum was posted immediately prior to the Application due date.
