# Performance Report FY2022

200 E. Grand Ave. Des Moines, Iowa 50319 515.281.5503

CIO@iowa.gov

## INTRODUCTION

The Department of Management Office of the Chief Information Officer (OCIO) submits this annual report pursuant to Iowa Code section 8E.210 which requires agencies to report on performance. This report includes an agency overview, narrative reports on key performance areas, and a review of FY22.

### **AGENCY OVERVIEW**

The Office of the Chief Information Officer (OCIO) is a division of the Department of Management (DOM) as of June 21, 2022. The time period covered in this report predates the OCIO realignment into the Department of Management. Per lowa Code 8B the OCIO was established to lead, direct, manage, coordinate, and provide accountability for the information technology resources of the state government. The office manages and directs the work of information technology staff, assigning information technology staff as required to support information technology requirements and initiatives of the office, to review and recommend approval of information technology staff employment decisions in coordination with the Department of Management, and to enter into contracts for the receipt and provision of information technology services. The Chief Information Officer is selected by the Director of DOM.

#### Mission

To provide high-quality, customer-focused information technology services and business solutions to state and local governments, non-profits, and to citizens.

#### Core Function

The OCIO supports the core function of enterprise resource management, providing all vital infrastructure needs necessary to administer and support agency operations. In an ongoing effort to steward the State's resources well, we are customer focused, results driven and understand enterprise value.

#### Divisions

- Application Development
- Business Services
- Enterprise Applications
- Infrastructure and Information Security Services
- Project Management Office (PMO)

#### Customers

Getting the right mix of solutions requires partnership. To that end, we view all state entities as colleagues and partners that work together on behalf of our customers, the citizens of lowa.

# Alignment with Governor's Goals

The Office of the CIO contributions help move the State towards achieving the Governor's goal to reduce the cost of government. In order to realize this goal, the OCIO is focused on process improvement, centralized administration, consolidation and service brokerage.

## **KEY RESULTS**

The following highlights are key FY 2022 results in services offered by the OCIO.

## State Employees Participating in Security Awareness Training:

The OCIO Information Security Services Bureau provisions and monitors the State's security awareness training program.

Why are we using this measure? The State's first line of defense in preventing a cyber-threat is its employees. Cybersecurity is everyone's responsibility and training is a critical part of our State's Cybersecurity program. Annual security training provides all State employees information about cybersecurity and their role in safeguarding data.

**What was achieved?** 100% of OCIO employees received ProofPoint security training. Agency compliance and participation are required to meet 100% participation targets. While ProofPoint was offered to all State agencies, several agencies elected not to fully participate in the training. Some agencies provided alternative security awareness training in lieu of the ProofPoint training. The actual performance is reflective of State employees participating in ProofPoint only. Of the 15,521 Executive Branch employees on record, 7,449 completed verifiable security awareness training online or in-person or 46%.

#### New IT Service Delivered:

The OCIO Business Services Division is responsible for identifying and procuring quality IT services that are broadly available for use by all government entities.

Why are we using this measure? Typically, services are procured in silos which means the government pays more for less efficient services and products. This measure ensures that OCIO continuously identifies new services to procure and make broadly available for all government entities to use for better, faster, and cheaper delivery of services to citizens.

**What was achieved?** OCIO procured and delivered 2 services this year to improve enterprise service delivery and to streamline enterprise IT procurement. Each service is briefly described below. Note: all mainframe services procured are under one heading.

- 1. Oracle Services
- 2. Technology Acquisition Services

Data sources: Business Services Division Administrator, Contract Documentation

Data reliability: Data retrieved from each service

# FY21 PERFORMANCE PLAN RESULTS

The Office of the CIO has established the following measurable goals to evaluate progress and moreover improve results so we can better serve citizens.

Name of Agency:	Name of Agency: Office of the Chief Information Officer							
Agency Mission: Provide client-centric information technology and business solutions to government and citizens								
through guidance, service delivery, and partnerships.								
Core Function: The OCIO supports the core function of enterprise resource management, providing all vital								
infrastructure needs necessary to administer and support agency operations								
Performance	Target	Actual	Performance Comments & Analysis					
Measure								
(Outcome)								
Service: Information Security								
Average host vulnerability score as measured by Information Security Services Bureau for current systems	2,000	OCIO Supported: 1,355	What Occurred: This number fluctuates based on new vulnerabilities discovered over time. It was 1996 at the point this report was created.  A lower score is better.  Quantity of Information Systems in scope: OCIO Owned: 852. OCIO Supported: 2932.  Data Source: Enterprise Vulnerability Management System (EVMS), Information Security Services Bureau.					
Percent of State employees receiving awareness training	100%	Enterprise (48%) OCIO (100%)	What Occurred: Of the 15,521 Executive Branch employees on record, 7,449 completed verifiable security awareness training online or in-person  Data Source: Data provided by OCIO Security Operations Center					
Service: Infrastructure Services								
Percent uptime for core network	99%	99.9%	What Occurred: Exceeded target performance for this fiscal year.  Data Source: Nagios network monitoring tool					
Performance Measure	Target	Actual	Performance Comments & Analysis					

(Outcome)							
Number of disaster recovery drills performed	3	5	What Occurred: Practicing recovery is critical for the readiness of IT systems. This metric showcases the number of exercises to promote disaster and incident preparedness.  Data Source: OCIO Information Security Services Bureau				
Service: Enterprise	Service: Enterprise Print Shop						
Percent of print jobs delivered on time	n/a	n/a	What Occurred: In FY22 Print shop was transferred to the DAS control This KPI should be removed.				
<b>Activity:</b> Business	Activity: Business Services						
Number of new IT services delivered	4	2	What Occurred: These services provided statewide consistency in negotiated terms and conditions, and offer agencies a set of managed services, reducing agency effort in contracting and freeing up time to focus on delivering business systems  1. Oracle Services 2. Technology Acquisition Services  Data Source: Business Services Division Administrator				
Service: Web Serv	Service: Web Services						
Percent uptime for websites	99%	99.9%	What Occurred: Met target KPI  Data Source: Akamai, security tool used to monitor all				
Service: Project M	Service: Project Management						
Percent of projects within 10% of budget	75%	100%	What Occurred: Exceeded target expectations. The projects included in this measure are managed by OCIO project managers including OCIO projects and agency projects.  Data Source: Google Project Site				

			What Occurred: 6 of 7 projects on time.
Percent of projects within 10% of schedule	75%	86%	Data Source: Google Project Site
