OPPORTUNITIES FOR CHANGE

Based on the analysis of the data there are several actions, which if taken, could alter the prison population forecasted in this report, including, but not limited to:

- Assessing institutional and community-based programming to mitigate and divert revocations of individuals in the community.
- Reserving the lifetime special sentence for the highest risk individuals and allow judicial discretion on the length of special sentences.
- Reducing mandatory minimum prison sentences.
- Increasing the use of effective treatment courts throughout the state.
- Identifying and utilizing appropriate services to address mental health issues.
- Expanding apprenticeship and other skill education programs in the correctional institutions.
